Intelligent Monitoring (IM) Report

GP IM is an initial list of 37 indicators that currently cover three of our five key questions - Effective, Responsive and Caring. The indicators used in IM are already included within the location data packs that you can access pre inspection. As with the approach followed in the Hospitals sector the tool draws on existing and established national data sources (e.g. QOF, GP Patient Survey).

This report presents CQCs view of the IM indicators for The Grey Road Surgery.

The information helps to inform:

- scheduling decisions
- identify potential concerns
- key lines of enquiry

We have published a document setting out the definition and full methodology for each indicator, a paper on the statistical methodology and a Frequently Asked Questions document. If, after consulting these documents, you have any further queries or need more information please email enquiries@cqc.org.uk putting the phrase "**GP IM Query**" in the subject line.
